

Four Corners Industry Workshop

Tuesday, November 6, 2018

10:00 AM to 5:00 PM

(4:00 PM Tracerco-sponsored Happy Hour)

DoubleTree by Hilton Hotel, 501 Camino del Rio, Durango

“An Exploration of Horizontal Well Technologies Using Science and Advanced Evaluation Techniques for Optimizing Unconventional Well Performance”

*This workshop is a survey of the latest advancements and techniques in geoscience, drilling, completions and reservoir engineering technologies for horizontal wells. The workshop is presented by **GeoStar Solutions** and three of GeoStar’s leading technology partners: **Field Geo Services, Total Depth and Tracerco.***

Workshop Agenda:

10:00 – Introductions to the workshop agenda, our presenters, and a safety moment

10:15 - “The Essentials for Drilling a ‘Perfect’ Horizontal Well” – KC Oren, President of **GeoStar Solutions LLC**

11:00 – “Should I Geosteer My Horizontal Well? Using the “European Method” for the Correlation and Identification of Key Reservoir Features and High Productivity Targeting” – Jason Harms, President of **Total Depth LLC**

12:00 – Workshop Luncheon

1:00 – “Practical Applications of Geochemistry and Best Practices in Horizontal Wells” – Scott Field, President of **Field Geo Services**

2:00 – “Measure and Define: A look at Production Measurements using Chemical Tracers and ... *getting results from your data!*” – Dave Bucior, North America Sales & Marketing Director, **Tracerco**

3:00 – 4:00 “*Tying your Well Data Together: A 4D View of Multi-Well Production Performance*” using case studies – Josh Ezernack, Sales Manager for Central US, **Tracerco**

“Productivity Improvements Through Integrated Analysis of Frac Tracer, Stimulation and Geophysical Data”

“Choke Size Really Does Matter”

“Solid Tracers: *Applications and Myths*”

“Tracers Proving Production Economics”

4:00 PM – Workshop Reception and Happy Hour sponsored by **Tracerco**
